It is the duty of the trial court to direct and control the proceedings and conduct of the trial so as to insure the orderly administration of justice. Therefore, it is the duty of the trial court to impose reasonable restraints on the conduct of counsel and parties before and during the trial to prevent prejudicial conduct and insure orderly proceedings. The trial court may not permit counsel to question the veniremen in the presence of the other members of the venire. *Adderholt v. State*, 551 S.W.2d 90 (Tex.Cr.App.1977). The State relies upon *Rose v. State*, supra, in support of the contention that defendant's objections were not sufficient to preserve error. However, the issue raised on appeal in *Rose* was not the same as that raised in defendant's bill of exception. The State's contention is not supported by *Rose*. Defendant's second ground of error is sustained. We do not find that the defendant was deprived of a fair trial because of the errors raised. In a very short trial a much larger amount of evidence was produced than would be necessary to sustain the conviction. See *Bullard v. State*, 548 S.W.2d 13 (Tex.Cr.App.1977). The judgment is reversed and the cause remanded. Q: Matlab: automate vgg model with ImageNet dataset? Is it possible to do preprocessing such as removing bias and whitening using vgg model? I was hoping to do it like this: Extract learned features using vgg model using Matlab, and load into NNs toolbox Use transfer function to scale the extracted features. Thanks! A: You can do this all with the `imtool` and `dlmread` functions in Matlab. Once
